

AUTHOR INDEX TO VOLUME 27

- Abrecht, D. G.—
 See Bristow, K. L. 575
- Ahern, C. R.—
 See Baker, D. E. 439
- Alter, D.—
 See Bacon, P. E. 685
- Armour, J. D., Ritchie, G. S. P., and
 Robson, A. D.—
 Changes with time in the availability of applied
 zinc to navy beans and its extraction from
 soils 699
- Asher, C. J.—
 See Kerven, G. L. 79, 91
- Austin, M. P.—
 See McKenzie, N. J. 289
- Aylmore, L. A. G.—
 See Phogat, V. K. 313;
 Sawada, Y. 17
- Bacon, P. E., Lewin, L. G., McGarity, J. W.,
 Houtt, E. H., and Alter, D.—
 The effect of stubble management and N
 fertilization practices on the nitrogen economy
 under intensive rice cropping 685
- Baker, D. E., and Ahern, C. R.—
 Estimates of effective rooting depth for
 predicting available water capacity of
 Burdekin soils, Queensland 439
- Baldock, J. A., and Oades, J. M.—
 Effect of electrolyte concentration on glucose
 decomposition in soil 433
- Baldock, J. A., Oades, J. M., Vassallo, A. M.,
 and Wilson, M. A.—
 Incorporation of uniformly labelled ^{13}C -glucose
 carbon into the organic fraction of a soil.
 Carbon balance and CP/MAS ^{13}C NMR
 measurements 725
- Barrow, N. J.—
 The reaction of plant nutrients and pollutants
 with soil 475
- Bell, D. T.—
 See Vlahos, S. 651
- Bell, L. C.—
 See Bruce, R. C. 333, 353
- Blackwell, J.—
 See Blackwell, P. S. 807
- Blackwell, P. S., and Blackwell, J.—
 The introduction of earthworms to an
 ameliorated, irrigated duplex soil in south-
 eastern Australia and the influence on
 macropores 807
- Boughton, W. C.—
 A review of the USDA SCS curve number
 method 511
- Bowman, G. M.—
 Podzol development in a Holocene
 chronosequence. I. Moruya Heads,
 N.S.W. 607
- Bramley, R. G. V., and White, R. E.—
 The effect of pH, liming, moisture and
 temperature on the activity of nitrifiers in a
 soil under pasture 711
- Bristow, K. L.—
 See Gillman, G. P. 183
- Bristow, K. L., and Abrecht, D. G.—
 The physical environment of two semi-arid
 tropical soils with partial surface mulch
 cover 575
- Brouwer, J.—
 Deep infiltration: significant or not? 471
- Bruce, R. C., Bell, L. C., Edwards, D. G.,
 and Warrell, L. A.—
 Chemical attributes of some Queensland acid
 soils. II. Relationships between soil and
 soil solution phase compositions 353
- Bruce, R. C., Warrell, L. A., Bell, L. C., and
 Edwards, D. G.—
 Chemical attributes of some Queensland acid
 soils. I. Solid and solution phase
 compositions 333
- Cardile, C. M.—
 See Lewis, D. C. 103
- Childs, C. W.—
 See Ross, C. W. 275
- Close, E. A., and Powell, H. K. J.—
 Rapidly extracted (0.02 M CaCl_2 soluble)
 'reactive' aluminium as a measure of
 aluminium toxicity in soils 663
 A field test method for soluble (0.02 M CaCl_2
 extractable aluminium in soils 673
 A field method for exchangeable (1 M KCl
 extractable) aluminium(III) in soils 681
- Clothier, B. E.—
 See Tillman, R. W. 637
- Cook, F. J.—
 See Prathapar, S. A. 645
- Coughlan, K. J.—
 See Thorburn, P. J. 27
- Daly, B. K.—
 See Lee, R. 377

- Daniells, I. G.—
Degradation and restoration of soil structure in
a cracking grey clay used for cotton
production 455
- Dexter, A. R.—
See Grant, C. D. 169
- Di, H. J., and Kemp, R. A.—
Variation in soil physical properties between
and within morphologically defined series
taxonomic units 259
- Donnollan, T. E.—
See Loch, R. J. 525
- Duhaylungsod, N. C.—
See McTainsh, G. H. 629
- Edwards, D. G.—
See Bruce, R. C. 333, 353
Kerven, G. L. 79, 91
- Freebairn, D. M.—
See Loch, R. J. 561
- Freebairn, D. M., Silburn, D. M., and Loch, R. J.—
Evaluation of three soil erosion models for clay
soils 199
- Gardner, E. A.—
See Thorburn, P. J. 27
- Geritz, A. F.—
See Thorburn, P. J. 27
- Gerritse, R. G.—
Simulation of phosphate leaching in acid sandy
soils 55
- Gilkes, R. J.—
See Vlahos, S. 651
- Gillman, G. P., Bristow, K. L., and
Hallman, M. J.—
Leaching of applied calcium and potassium from
an Oxisol in humid tropical Queensland 183
- Grant, C. D., and Dexter, A. R.—
Generation of microcracks in moulded soils by
rapid wetting 169
- Greene, R. S. B., and Tongway, D. J.—
The significance of (surface) physical and
chemical properties in determining soil surface
condition of red earths in rangelands 213
- Hainsworth, J. M.—
See Sawada, Y. 17
- Hall, G. F.—
See Ringrose-Voase, A. J. 779
- Hallman, M. J.—
See Gillman, G. P. 183
- Hallman, P.—
See Kerven, G. L. 79, 91
- Hodge, T. J. V., and Lewis, D. C.—
A description of acid soils and the relationships
between properties of acid soils and the nutrient
status of grazed pastures in the south-east of
South Australia 149
- Holford, I. C. R.—
Efficacy of different phosphate application
methods in relation to phosphate sorptivity
of soils 123
Effects of lime on the residual effectiveness of
phosphate in acid soils 425
- Hoult, E. H.—
See Bacon, P. E. 685
- Kapoor, A., Pal, Raj, and Poonia, S. R.—
Prediction of exchangeable sodium percentage
in soils by mechanistic and layer models 325
- Kemp, R. A.—
See Di, H. J. 259
- Kerven, G. L., Edwards, D. G., Asher, C. J.,
Hallman, P. S., and Kokot, S.—
Aluminium determination in soil solution.
I. Evaluation of existing colorimetric and
separation methods for the determination of
inorganic monomeric aluminium in the presence
of organic acid ligands 79
II. Short-term colorimetric procedures for the
measurement of inorganic monomeric
aluminium in the presence of organic acid
ligands 91
- Kinnell, P. I. A., and McLachlan, C.—
Shallow soil monoliths for laboratory studies
on soil erosion from undisturbed soil
surfaces 227
- Kokot, S.—
See Kerven, G. L. 79, 91
- Lee, R., Taylor, M. D., Daly, B. K., and
Reynolds, J.—
The extraction of Al, Fe and Si from a range of
New Zealand soils by hydroxylamine and
ammonium oxalate solutions 377
- Levin, L. G.—
See Bacon, P. E. 685
- Lewis, D. C.—
See Hodge, T. J. V. 149
- Lewis, D. G., and Cardile, C. M.—
Hydrolysis of Fe^{III} solutions to hydrous iron
oxides 103

- Little, I. P.—
The use of a copper thiourea reagent for the determination of exchangeable basic cations in soils 117
A dispersibility index for soils and its dependence on other soil properties tested with a group of soils from the Lockyer Valley uplands, Qld, and the lower Namoi Valley, N.S.W. 493
- Loch, R. J.—
See Freebairn, D. M. 199;
Silburn, D. M. 543
Loch, R. J., and Donnollan, T. E.—
Rill erosion of a self-mulching black earth.
I. Effects of tillage 525
Loch, R. J., Maroulis, J. C., and Silburn, D. M.—
Rill erosion of a self-mulching black earth.
II. Comparison of sediment transport equations 535
Loch, R. J., Silburn, D. M., and Freebairn, D. M.—
Evaluation of the CREAMS model.
II. Use of rainulator data to derive soil erodibility parameters and prediction of field soil losses using derived parameters 561
- Lovell, C. J.—
See Proffitt, A. P. B. 759
- McGarity, J. W.—
See Bacon, P. E. 685
- McKenzie, N. J., and Austin, M. P.—
Utility of the Factual Key and Soil Taxonomy in the lower Macquarie Valley, N.S.W. 289
- McKenzie, N. J., and MacLeod, D. A.—
Relationships between soil morphology and soil properties relevant to irrigated and dryland agriculture 235
- McLachlan, C.—
See Kinnell, P. I. A. 227
- MacLeod, D. A.—
See McKenzie, N. J. 235
- McLeod, M.—
See Singleton, P. L. 67
- McTainsh, G. H., and Duhaylungsod, N. C.—
Aspects of soil particle-size analysis in Australia 629
- Maroulis, J. C.—
See Loch, R. J. 535
- Ma'shum, M., Oades, J. M., and Tate, M. E.—
The use of dispersible clays to reduce water-repellency of sandy soils 787
- Mew, G.—
See Ross, C. W. 275
- Meyer, W. S.—
See Prathapar, S. A. 645
- Moss, A. J.—
Impact droplets and the protection of soils by plant covers 1
- Muneer, M., and Oades, J. M.—
The role of Ca-organic interactions in soil aggregate stability.
I. Laboratory studies with ^{14}C -glucose, CaCO_3 and $\text{CaSO}_4 \cdot 2\text{H}_2\text{O}$ 389
II. Field studies with ^{14}C -labelled straw, CaCO_3 and $\text{CaSO}_4 \cdot 2\text{H}_2\text{O}$ 401
III. Mechanisms and models 411
- Oades, J. M.—
See Baldock, J. A. 433, 725
Ma'shum, M. 787
Muneer, M. 389, 401, 411
- Pal, Raj—
See Kapoor, A. 325
- Percival, H. J.—
See Singleton, P. L. 67
- Phogat, V. K., and Aylmore, L. A. G.—
Evaluation of soil structure by using computer assisted tomography 313
- Poonia, S. R.—
See Kapoor, A. 325
- Powell, H. K. J.—
See Close, E. A. 663, 673, 681
- Prathapar, S. A., Meyer, W. S., and Cook, F. J.—
Effect of cultivation on the relationship between root length density and unsaturated hydraulic conductivity in a moderately swelling clay soil 645
- Prebble, R. E.—
See Ross, P. J. 39
- Proffitt, A. P. B., Rose, C. W., and Lovell, C. J.—
A comparison between modified splash-cup and flumic techniques in differentiating between soil loss and detachability as a result of rainfall detachment and deposition 759
- Reynolds, J.—
See Lee, R. 377;
Sparling, G. P. 161
- Rhodes, D. W.—
See Ringrose-Voase, A. J. 779
- Ringrose-Voase, A. J., Rhodes, D. W., and Hall, G. F.—
Reclamation of a scalded, red-duplex soil by waterponding 779
- Ritche, G. S. P.—
See Armour, J. D. 699
- Robson, A. D.—
See Armour, J. D. 699
- Rose, C. W.—
See Proffitt, A. P. B. 759

- Ross, C. W., Mea, G., and Childs, C. W.—
Deep cementation in late Quaternary sands near
Westport, New Zealand 275
- Ross, P. J., and Prebble, R. E.—
Non-destructive measurement of soil clod
volume using hexane displacement 39
- Ryan, P. J.—
Boron retention within a catena rhyolitic soils
and its effect on radiata pine growth and
nutrition 135
- Sawada, Y., Aylmore, L. A. G., and
Hainsworth, J. M.—
Development of a soil water dispersion index
(SOWADIN) for testing the effectiveness of
soil-wetting agents 17
- Scotter, D.R.—
See Tillman, R. W. 637
- Silburn, D. M.—
See Freebairn, D. M. 199;
Loch, R. J. 535, 561
- Silburn, D. M., and Loch, R. J.—
Evaluation of the CREAMS model.
I. Sensitivity analysis of the soil erosion/
sedimentation component for aggregated
clay soils 543
- Singleton, P. L., McLeod, M., and Percival, H. J.—
Allophane and halloysite content and soil solution
silica in soils from rhyolitic volcanic material,
New Zealand 67
- Sparling, G. P.—
See West, A. W. 747
- Sparling, G. P., West, A. W., and Reynolds, J.—
Influence of soil moisture regime on the
respiration response of soils subjected to
osmotic stress 161
- Speir, T. W.—
See West, A. W. 747
- Summers, K. J.—
See Vlahos, S. 651
- Tate, M. E.—
See Ma'shum, M. 787
- Taylor, M. D.—
See Lee, R. 377
- Thorburn, P. J., Gardner, E. A., Geritz, A. F.,
and Coughlan, K. J.—
The effect of wetting pre-treatment on the
desorption moisture characteristic of
Vertisols 27
- Tillman, R. W., Scotter, D. R., Wallis, M. G.,
and Clothier, B. E.—
Water-repellency and its measurement by using
intrinsic sorptivity 637
- Tongway, D. J.—
See Greene, R. S. B. 213
- Vassallo, A. M.—
See Baldock, J. A. 725
- Vlahos, S., Summers, K. J., Bell, D. T., and
Gilkes, R. J.—
Reducing phosphorus leaching from sandy soils
with red mud bauxite processing residues 651
- Walker, P. H.—
Contributions to the understanding of soil and
landscape relationships 589
- Wallis, M. G.—
See Tillman, R. W. 637
- Warrell, L. A.—
See Bruce, R. C. 333, 353
- Watkinson, J. H.—
Measurement of the oxidation rate of elemental
sulfur in soil 365
- West, A. W.—
See Sparling, G. P. 161
- West, A. W., Sparling, G. P., and Speir, T. W.—
Microbial activity in gradually dried or
rewetted soils as governed by water and
substrate availability 747
- White, R. E.—
See Bramley, R. G. V. 711
- Willett, I. R.—
Causes and prediction of changes in extractable
phosphorus during flooding 45
- Wilson, M. A.—
See Baldock, J. A. 725
